Introduction

Just a quick note to say these pages have heaps of spoilers in them so continue at your own expense. I won't tell you what happens but you could inadvertently see when your favourite character dies.

While reading *Shards of a Broken Crown* I was getting very confused with all the characters and how they were related. So I combined my hobby of family history with my interest in the Riftwar saga. I've been doing this genealogy for about 2 years but still have heaps to add. At the moment these Genealogies are limited to the conDoin, Jameson, von Darkmoor families and some of the Elves.

One thing that doesn't convert from my family tree program is that I show Pug as the Adopted son of Borric. Also he is shown as Megar's Foster son, but this doesn't show in the report as well.

Some might ask why and how I can assign a year to any given event when there isn't any reference to a year in any of the books. The assigning of a date is only to give an idea of how long a particular character lives and it also means you can describe what they have done at different parts of their life. Please don't read anything else into these dates. For ease of calculation I started with Magician being set in the year 1000, hence Pug was born 987. A lot of the dates came from Canaan Machida's Timeline Page.

Finaly all mistakes or errors must be mine because Ray is the ultimate source of infomation on the people and places contained here.

Note: Each time a duplicated individual is listed, it will have a bracketed number next to it, such as [1]. This makes it easier to identify the duplicated individual. If there are several individuals duplicated the first one will be assigned [1], the second one will be assigned [2] and so on.
